

Gauer Power — What We Need From You

3 quick items to finish your build & switch on the full system. Cranbrook, BC.

CRM TEXTING
Waiting on you

GOOGLE MAPS
Waiting on you

Your site is live and the system is built. To switch on the parts that actually make the phone ring — automatic texts and Google Maps ranking — we just need three things from you. Five minutes on your end.

The 3 things

1 Business / corporation registration number

MOST IMPORTANT

Unlocks all of your **automatic texting** — the instant reply when a new lead comes in, missed-call text-back, and Google review requests. Carriers require this number to approve business texting. **Nothing texts until this is in.** This is the one that matters most.

2 Google Business Profile manager access

UNLOCKS MAPS

Add john@apexacq.co as a manager on your Google Business Profile. Your map pin currently sits ~70km north of Cranbrook, which is killing how high you show up in local searches. Once we're in, we fix the pin, add photos and services, and turn on the review engine.

3 Electrical license number + licensing body

TRUST SIGNAL

Goes on the site as a trust badge for homeowners. We need the real number and which body issued it (BC) so we display it accurately.

Then we handle the rest

Once the above is in, we finish the texting workflows, fix your Google Maps ranking, wire up the review engine, and move the site onto gauerpower.ca. You don't have to touch any of it.
